SUMMARY

Final-year Computer Science student at Helwan University and Full-Stack .NET developer with experience in building web-based systems and portals. Skilled in both front-end and back-end development, system integration, and creating solutions that streamline workflows and enhance communication. Strong problem-solving abilities and experience delivering projects for academic and professional clients.

PROFESSIONAL EXPERIENCE

Coding Instructor Nov 2024 – present
3C Coding School Cairo, Egypt

Summer Internship Jul 2025 – Aug 2025
CIB Bank Cairo, Egypt

EDUCATION

Faculty of computers and Artificial intelligence Helwan University Oct 2022 – Present
Bachelor
Specialization: Software Engineering

PROJECTS

Mezan Platform For Judicial Affairs Sep 2025 – Present
Work in Progress
A system responsible for facilitating the process of registering legal cases, from the initial registration in the system, assigning them to lawyers, and tracking the progress of each case including hearings, judgments, and legal decisions, as well as providing full access to case files. The system also enables text-based communication between lawyers and allows the administration to monitor all operations and grant the necessary permissions.
Important note: This system is being developed as a freelance project on the platform Mostaql.

Faculty Portal System Sep 2025 – Present
Work in Progress
A project currently under development for Helwan University, consisting of a portal for faculty members that will allow them to upload their research, add their professional experiences, and provide their CVs. The system will also enable the university's senior administration to monitor operations and facilitate communication between registered faculty members. Additionally, this system will integrate with other systems responsible for managing faculty data.

Ticket Now Platform Apr 2025 – Jun 2025
An online ticket reservation platform where vendors can submit entertainment or sports events for admin approval before being listed for customer booking

Healx Clinic Platform May 2025 – May 2025
An online healthcare platform that enables patients to book appointments with doctors and communicate with them using real-time chat. The system admin adds doctors and assigns them to time slots

Port Management System Apr 2025 – May 2025
Developed a ship tracking system that records arrival/departure dates, classifies cargo (dangerous/safe), automates ship management based on schedules, and provides a 7-day forecast. Includes admin and user roles: admins manage users and view ships; users add ships, assign terminals, and manage operations

SKILLS

Software Development
ASP Dot NET Core - ASP Dot NET Web API - ASP Dot NET MVC - Entity Framework Core - LINQ - T-SQL - JS - CSS - HTML Boostrap5

Programming Concepts
REST APIs - Domain Driven Design - Tiered Architectures - Design Patterns - Solid Principles - Agile Development Methodologies - Database Management - Data Structures - Quality Standards - Troubleshoot Issues

Version Control
Git - Github

Familiarity With Project Management Platforms
Jira - Azure Devops

Soft Skills
customer focused - entrepreneurial - Resilient - creative - problem-solving skills - effective communication - Attention to Detail - follow instructions

COURSES

Web Development Using .Net Technologies Jul 2025 – Aug 2025
Information Technology Institute (ITI)

Fullstack .NET Internship Oct 2024 – May 2025
Digital Egypt's pioneers Cairo, Egypt

AWARDS

Instructor of the month Jan 2025
3C Coding School

Recognized for outstanding teaching performance, student engagement, and dedication to coding education at 3C Online Coding School.

CERTIFICATES

- CIB Bank One Month Remote Internship
- Digital Egypt's Pioneers (DEPI) Fullstack Dot Net Course
- Information Technology Institute (ITI) Dot Net Technologies Course
